What is Design Review?
Design review involves a comprehensive evaluation of the site plan, architectural and landscape design components of development.

The principles and guidelines for Design Review are set forth in the City of Chula Vista Design Manual. The Design Manual (pdf) must be used in conjunction with City’s development standards. These include building and fire codes, site and facility accessibility requirements for the disabled, zoning and planned community district regulations, grading and subdivision regulations, and the Landscape Manual (pdf) among others. There are also specific and precise plans, such as the Urban Core Specific Plan (UCSP) and/or various Sectional Planning Area (SPA) Plans that have project specific design guidelines, which may supplement or supersede the otherwise applicable guidelines, standards and regulations. The Planning Division may be contacted regarding which, if any, of these other plans, standards and guidelines may apply to a property. To determine if your project is subject to the UCSP or a SPA Plan click Here. Copies of the City’s Design and Landscape Manuals are also available at the Development Services counter, or by calling (619) 691-5101.

When do you need a Design Review?
Development projects, including expansion or alteration of structures, in all multi-family (R-3 zones), commercial and industrial zones, are subject to Design Review.

How to apply for Design Review

The following Process Flow Charts illustrate the key steps in the Design Review process as described in more detail below.

(Pre-Application: We recommend that the first thing you do is request a Pre-Application meeting. The purpose of this optional meeting is to give you the opportunity to meet with representatives from various City departments/divisions to identify and discuss any major issues at an early stage of the project. For more information call 619-691-5101 or visit the Development Services counter located in the Public Services Building 200 at 276 Fourth Avenue (northwest corner of Fourth and F Street, downtown Chula Vista).

Pre-Submittal and Completeness Check: Prior to submitting a full application package, applicants are encouraged to schedule an optional pre-submittal meeting with the Project Manager regarding the project. One copy of a completed application form, a set of the project plans and other documents (previously specified by the Project Manager), should be provided by the applicant at the meeting. The purpose of the meeting is to verify that the application package includes all the necessary information required for processing the request as outlined in the application checklist. The completeness check ensures that a project application is complete before it’s routed for review and comment by other departments/divisions and the Project Manager. The Project Manager will conduct the completeness check of the application package.

Complete Application: A project application will be deemed complete for processing if all the materials submitted meet the requirements of the submittal checklist for the application type. If the application is deemed complete, the application checklist will be initialed by city staff (Project Manager or Senior Planner) and provided to the applicant at the Pre-submittal meeting along with instructions for a full submittal as outlined in the applicable application checklist. The applicant and Project Manager will schedule a meeting, at the earliest possible time, to formally submit the required number of copies of the application package for intake.)
Incomplete Application: If the application is incomplete, the Project Manager or Senior Planner will outline the missing items on the application checklist and schedule a follow-up meeting with the applicant to confirm the incomplete items have been satisfied and to initial the checklist. Re-submitting of an incomplete application will be given to the original Project Manager or Senior Planner who conducted the first completeness check to do a second completeness review. Once the application is deemed complete, the application will be submitted to intake and routed for City department review and processing.

Walk-in Submittals: In instances where no pre-application meeting was held, no previous contact with city staff has been made, and a Pre-Submittal meeting was not scheduled, a Senior Planner will perform the completeness check and subsequently assign to a Project Manager. The application will be logged in but the completeness check may take from two weeks to 30 days to complete. Upon review of the application, the Senior Planner will contact the applicant pursuant to one of the processes described above.

Project Review: Once the application is deemed complete, the application and projects plans are routed to City Departments for review and, if applicable, to outside agencies such as the school districts or water districts. Processing times vary depending upon the complexity of the project, additional studies and/or information needed to address staff questions, and environmental review status. Generally, however, 3-4 weeks after the application has been filed, the applicant will be notified of staff comments for the project plans. If deemed necessary, staff will arrange for a project review meeting with the applicant and representatives from other city departments to discuss the comments in detail. The project review may require additional submittals to respond to comments and corrections required for compliance with the City’s regulations and development standards.

Also, upon submittal of a complete application and distribution to City Departments for review and comment, a Notice of Application (NOA) will be sent to property owners within 500 feet of the project site and to a list of Interested Parties who have requested such notification. Depending upon the level of interest in the project or if the project is subject to the consolidated hearing process (CVMC 19.14.050), a community meeting may be scheduled for the project.

Following project evaluation and completion of environmental review, final plans and exhibits will be prepared by the applicant for consideration or public hearing.

Decision Making: Depending on the type of project, its impacts or potential controversy, the Zoning Administrator (ZA) may make the decision. In other cases, the project must be heard by the Planning Commission.

Zoning Administrator Decision: Pursuant to CVMC 19.14.582(l), the following types of applications will be reviewed by the ZA and will not require a public hearing:

- Residential projects of ten (10) units or less
- New commercial, industrial, or institutional development or additions which constitute less than 20,000 sq. ft.

In approximately 4-8 weeks after an application has been deemed complete and if environmental review is not required, a copy of a draft Notice of Decision (NOD) will be provided to the applicant prior to the consideration date for review. Notification of pending decision will be provided to property owners and tenants within 500 feet of the project site and to those interested parties who have requested to be notified. In the event no objections or protests are received, the ZA will approve, conditionally approve or deny the request. After the project is approved the final NOD will be sent to the applicant for signature, and to any interested party who requested a copy. The NOD will also be posted on the City’s website. In the event objections or protests are received, the ZA shall set the matter for public hearing before the ZA or at the discretion of the ZA; the matter may be referred to the Planning Commission (PC).
Planning Commission Decision: After project review, including environmental clearance, the project will be scheduled for public hearing. The applicant will be notified of the date of public hearing. A copy of a draft Conditions of Approval will be provided to the applicant prior to the public hearing. The project architect/designer and the applicant or a designated representative should, in all cases, attend the meeting. Notification will be provided to property owners and tenants within 500 feet of the project site and to those interested parties who have requested to be notified.

Planning Commission meetings are held on the second and fourth Wednesday of every month at 6:00 pm. The meetings are noticed and open to the general public. After conducting a public hearing, during which time the applicant and other interested parties may speak, the Planning Commission may approve, conditionally approve or deny the request.

Consolidated Hearing: Pursuant to CVMC 19.14.050(C), for projects that require more than one permit or other approval for a single development (e.g. design review, conditional use permit, and a rezone), the applications shall be consolidated for processing and shall be reviewed by a single decision maker or decision-making body. The consolidated application shall be heard by the decision maker or decision-making body associated with the highest level action among the applications to be considered. The findings required for approval of each permit shall be considered individually, consistent with CVMC Sections 19.14.080; 19.14.190 and/or 19.14.582(E) as applicable.

Appeals of Decisions: Pursuant to the CVMC 19.14.588, an interested party may appeal the decision of the ZA, or PC to the City Council. The appellant must be an interested party. An interested party means a person who was present at a public hearing from which an appeal arose, and who had filed a speaker slip with the decision maker at that public hearing, or a person who expressed an interest in the project in writing to that decision-making body before the close of the public hearing or a decision on an action from which an appeal may be filed. The appellant must file a complete appeal application form (pdf) within the specified appeal period (10 business days after the decision has been made), complete the Disclosure Statement, and pay the required fee. If determined to be valid, the appeal will then be scheduled for a hearing by the City Council within 30 days.

Possible Requirements for Public and Private Improvements: Applicants for development projects, including additions and interior/exterior remodels, and some proposals involving a change in land use, are advised that they may be required to install and/or modify on- and off-site public and private improvements and pay impact fees. Improvements may include on-site structures, paving and landscaping, and requirements to dedicate, improve and/or modify streets and other public facilities off-site. Fees may include sewer, traffic and development impact fees. The necessity for or exact extent of these requirements and fees, if any, are generally not known until an application has been filed and routed for review and comment to the various City departments and outside agencies. Applicants are encouraged to contact the City regarding the possibility for and the general extent of these requirements at the earliest possible stage of project consideration.

Environmental Review: A design review permit is a discretionary action and requires review for compliance with the California Environmental Quality Act (CEQA). Projects will either be determined to be exempt from CEQA or will require environmental review involving the processing of an Initial Study or Environmental Impact Report, which will extend the processing time frames. Environmental review can be processed concurrently with design review; however, action on the Design Review application may not occur until the environmental process is complete. Staff should be able to determine whether or not environmental review will be required at the pre-application meeting. A separate application form and deposit are required for environmental review (pdf).
Process for Review of Administrative Projects

Application Submitted – routed for review by City Departments → Notice of Application distributed* → Project Review complete - Notice of Pending Consideration Date distributed → Consideration by Zoning Administrator → Notice of Decision Posted on website

* Community meeting held for projects with significant public response to Notice of Application
DEVELOPMENT REVIEW PROCESS FOR PROJECTS REQUIRING PUBLIC HEARINGS

DEVELOPMENT SERVICES DEPARTMENT

INITIAL INQUIRY (OPTIONAL)

PRE - APPLICATION MEETING (OPTIONAL)

PRE - SUBMITTAL MEETING (REVIEW ONE SET) (OPTIONAL)

APPLICATION PACKAGE DEEMED COMPLETE** FOR PROCESSING (MANDATORY)

APPLICATION INTAKE MEETING

APPLICATION DISTRIBUTED TO OTHER DEPARTMENTS

DEPARTMENTS RESPOND
