

## COVID-19 RABIES VACCINATION PROCEDURES

**Thank you for helping everyone stay healthy by following these instructions.**

If you need a Rabies vaccination for your animal, we can set an appointment for you during this time. We have a temporary process to conduct these activities safely.

First fill out the webform by following [this link](#). You will let us know what specific service you need, contact information for you, information about your pet, and will consent to the service online to shorten your visit and avoid handing back and forth pens/paper.

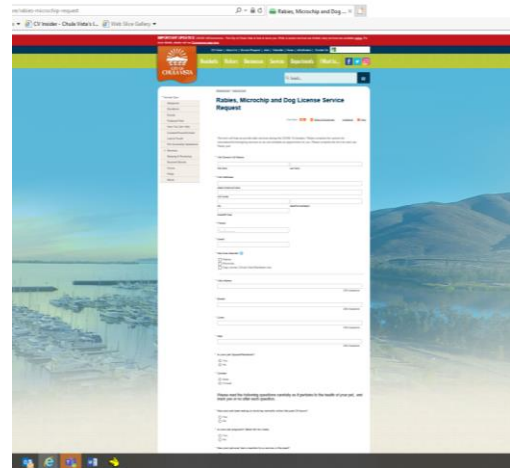

The webform will give online payment instructions based on the service you need.

Once that is complete we will contact to set up an appointment time. We cannot accommodate drop in services at this time.

This webform will be used to consent for services, and is not necessary for licensing only. ***If you just need a license please [click here](#) to license your dog.***

Your appointment time is a very specific window to maintain social distancing for all. If you miss your appointment window, you will have to call back to determine another appointment time.

You need to come wearing a mask and we ask that only one adult per pet come to the table at a time.

Come to the table set up in front of the lobby at 130 Beyer Way at your designated appointment time. Only come if everyone in your household is feeling fine.

You should be wearing your mask. When you approach please maintain 6 feet away from any other persons that may be in the area.

All dogs must be on a leash and cats in a carrier. Please only bring one pet at a time to the table if you have multiple pets with you. You can leave the others in the car while you get each one their service. This is a quick service, so leaving them in the car should not be a problem for overheating.

If your pet is a dog we will ask you to restrain your dog for the shot. If you are not able to restrain your dog, please let us know in advance so we can get staff assistance. If it is a cat we will ask you to wait while we take the cat back to an enclosed room to avoid escape.

You will then be given the applicable paperwork for you and your pet (Rabies/License Cert, Receipt, microchip information, etc.)

**Then you are on your way!**
