* Family Size (1-8) Adjustment: Adjustments are made so larger families have higher income limits. The 4-person income limit serves as the base in calculating income limits for household sizes other than 4 persons. For family sizes ranging from 1 to 8 persons, the multipliers are as follows:								
Number of Persons (below):								
1	2	3	4	5	6	7	8	
0.7	0.8	0.9	1.0 (base)	1.08	1.16	1.24	1.32	
Decimal Multipliers (above):								
For households larger than eight persons (all income categories), determine income limit as follows:								
Per person (PP) adjustment above 8: (1) multiply the four-person income limit by eight percent (8%), (2) multiply result by number of persons in excess of eight, (3) add the amount to the income limit for eight persons, and (4) round the result to the nearest \$100.								
EXAMPLE	4 persons	x 8% PP Adj	added to 8 persons	= 9 persons		8 persons+8%PPAdj(x2)	=10 persons
