| 4/11/2020 | 170 | 7 | 9.70% |

Note:
This data should not be interpreted as an indication of activity in any specific location. COVID-19 now has reached community transmission status, which means people may have contracted the illness somewhere else in the county, but this may not necessarily be in the city where they live. Under a community transmission status, the true prevalence of this disease may not be known as most cases are likely not diagnosed or reported. More information may become available as individual case investigations are completed. A summary of cases by zip code of residence is available on the County of San Diego [Coronavirus Website](#). Data are preliminary and subject to change. Data Source: County of San Diego Public Health Services
